Iceberg ✓

Additional (higher powered) Radio Equipment
for Iceberg caches

Ref: Para 4 of MGK-A-1669

1. We are interested to know whether [] as seen in the above reference, made inspection of the areas he proposed as special burial places for the radio equipment larger than equipment already furnished Iceberg project. You may recall that [] was present during these discussions. We are interested in the idea of burying higher powered equipment in ideal locations and in order to implement such a plan we must be in a position to gauge our supply procurement program to the operation.
2. In view of the above we would appreciate any comments on the progress of []'s investigation.
